Summary

I'm a Frontend Developer passionate about crafting responsive web applications with React, JavaScript, HTML, and CSS

Experience

● **FOXBIZ SOFTWARE PVT.LTD**

INTERN

February 2025 -

Projects

● **whispr**

March 2025 -

Whispr is a real-time messaging application designed for seamless and efficient communication. Built with **React.js** on the frontend and **MongoDB** for data storage, it leverages **Socket.io** to enable instant messaging between users. The app is structured with a dedicated frontend and backend, ensuring scalability and flexibility. Users can securely log in, send and receive messages in real time, and access their chat history, which is stored in **MongoDB** and cached in **localStorage** for quick retrieval. The modern **React.js** interface provides a smooth and intuitive user experience, making conversations feel natural and engaging. With a robust backend powered by **Node.js** and **Express.js**, Whispr efficiently manages authentication, message storage, and real-time interactions. Designed for speed, reliability, and security, Whispr is an ideal chat solution for both personal and professional communication.
